

MSSND #6: Device Lock-out

Windows

Lock out

1. Settings > Accounts

2. Sign-in options > Require sign-in > When PC wakes up from sleep

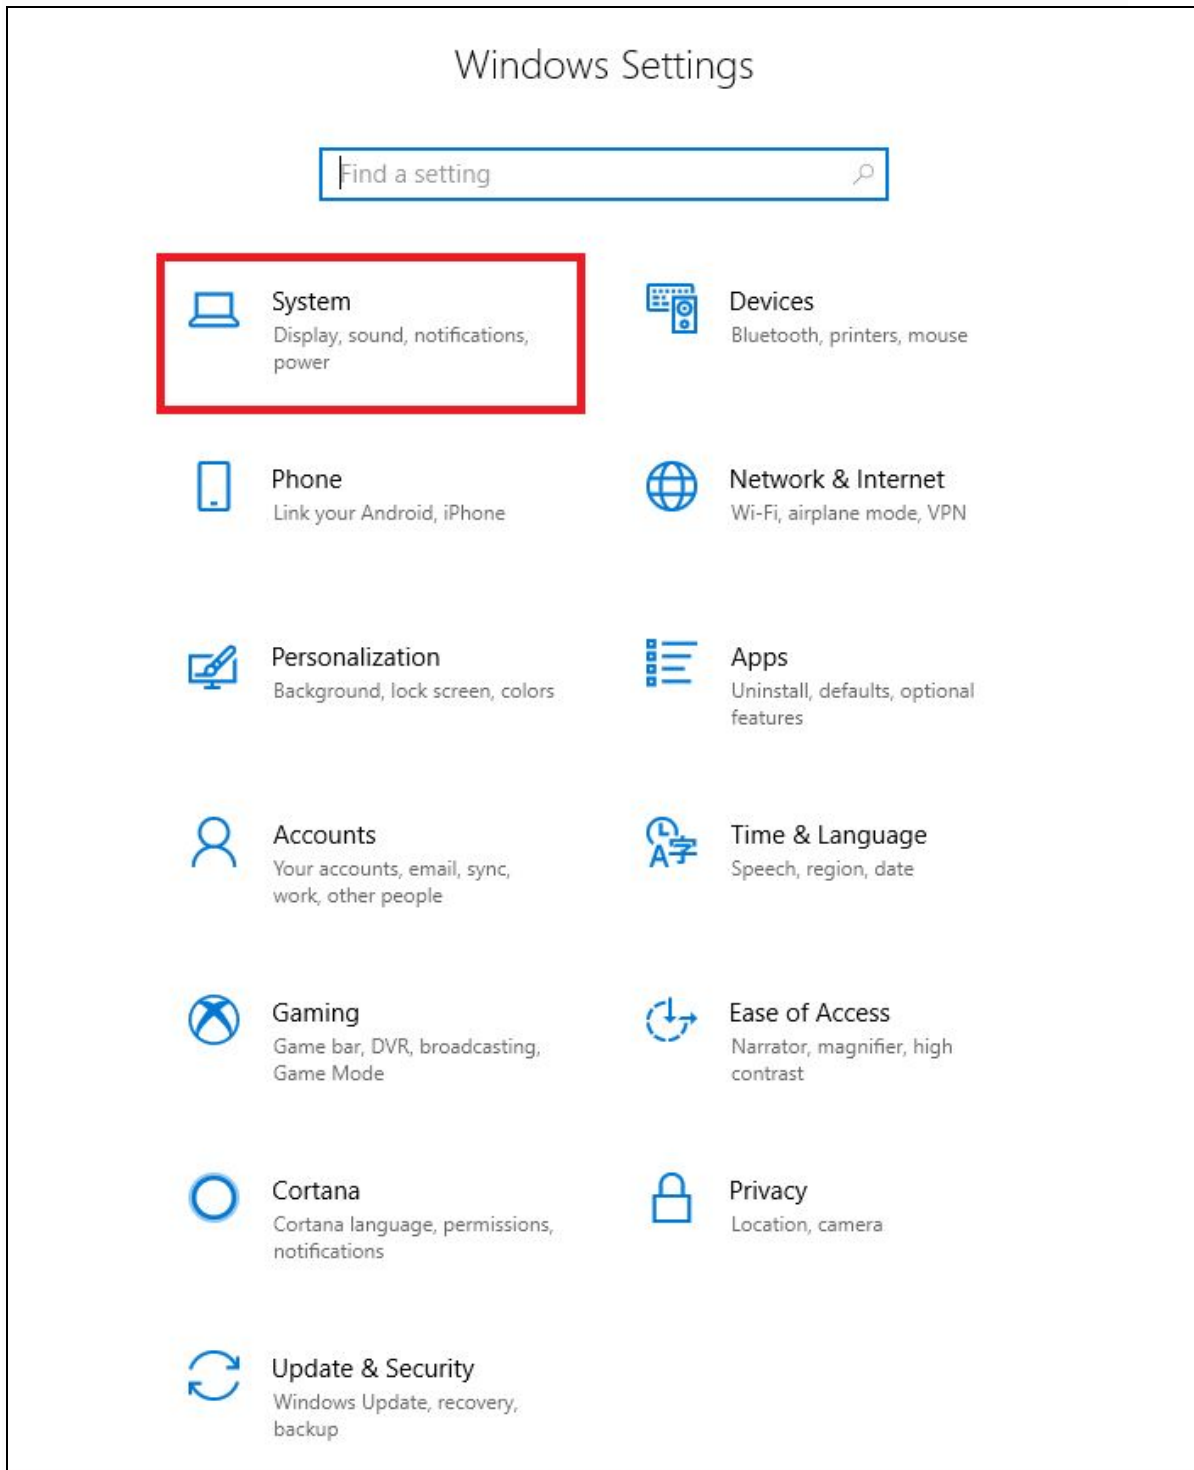

The screenshot shows the Windows Settings application. On the left is a navigation pane with a search bar and several categories: Home, Accounts, Your info, Email & accounts, Sign-in options (highlighted with a red box), Access work or school, Family & other users, and Sync your settings. The main area is titled 'Sign-in options' and contains the following content:

- Sign-in options**
Manage how you sign in to your device
- Select a sign-in option to add, change, or remove it.
- Windows Hello Face
This option is currently unavailable—click to learn more
- Windows Hello Fingerprint
This option is currently unavailable—click to learn more
- Windows Hello PIN
Sign in with a PIN (Recommended)
- Security Key
Sign in with a physical security key
- Password
Sign in with your account's password
- Picture Password
Swipe and tap your favorite photo to unlock your device

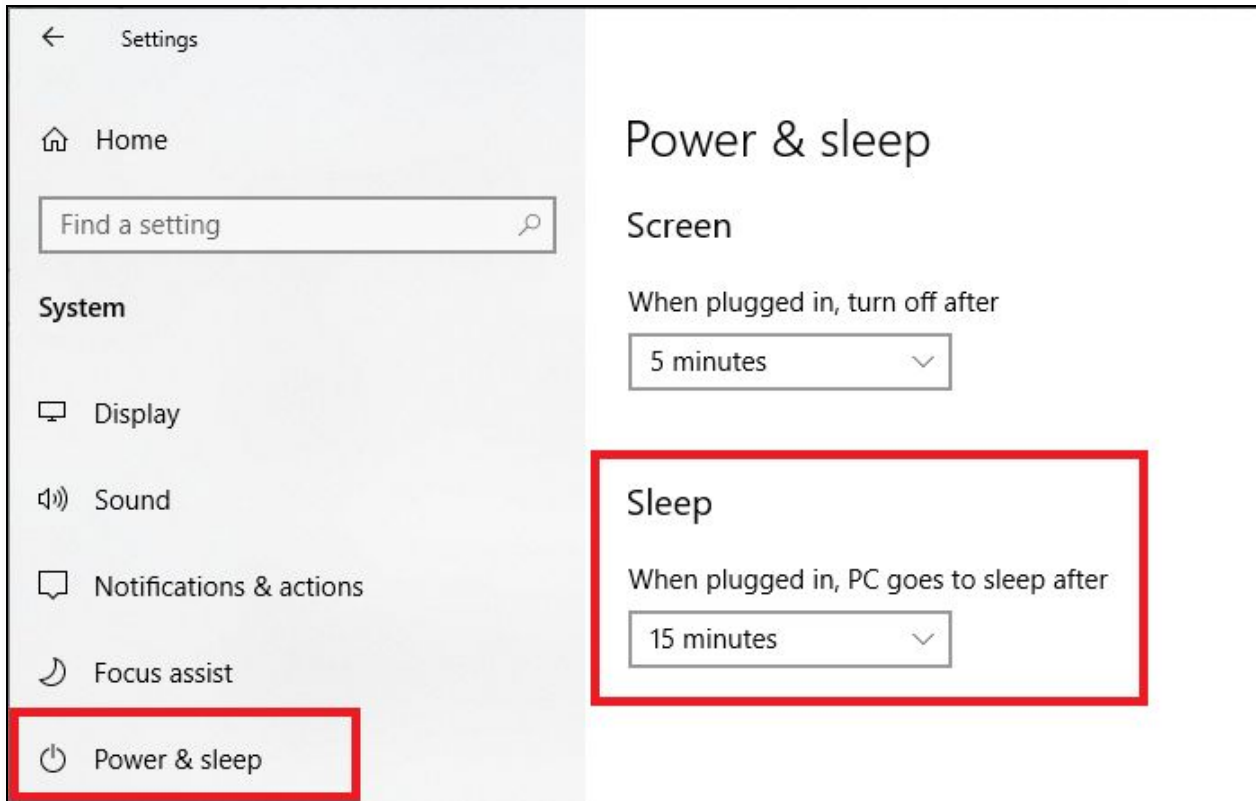

At the bottom of the main area, there is a section titled 'Require sign-in' (highlighted with a red box) with the following text and a dropdown menu:

If you've been away, when should Windows require you to sign in again?
When PC wakes up from sleep

3. Settings > System

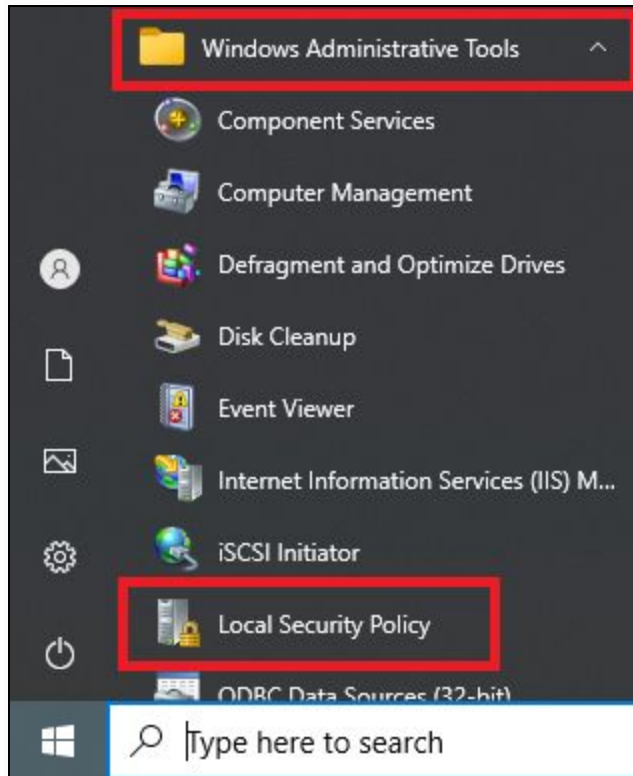

4. Power and Sleep > When plugged in, PC goes to sleep after 15 minutes

Prevent brute-force password login attacks

1. Administrative Tools > Local Security Policy

2. Account Policies > Account Lockout Policies

- a. 3 minute lockout duration
- b. 3 invalid attempts
- c. 3 minute reset counter
